5 of 5 review helpful Lakoff and Johnson are high caliber scientists By philly I bought this along with a book by Dan

Dennett on free will and Charles Peirce on semiotics Dennett s book was terrible especially in contrast to this well written and clear book I am a fan of Peirce s semiotics and some examples in this book embodied many of his concept I was really shocked at how many parallels I was finding Arriving What are human beings like How is knowledge possible What is truth Where do moral values come from Questions like these have stood at the center of Western philosophy for centuries In addressing them philosophers have made certain fundamental assumptions mdash that we can know our own minds by introspection that most of our thinking about the world is literal and that reason is disembodied and universal mdash that are now called into question by well establi com George Lakoff and Mark Johnson take on the daunting task of rebuilding Western philosophy in alignment with three fundamental lessons from cognitive science The mind is inherently embodied thought is mostly unconscious and abstract concepts are largely
