From Lexington Books : The Anthropology of Sport and Human Movement: A Biocultural Perspective the following outline is provided as an overview of and topical guide to social science social science branch of science

concerned with society and human behaviors a race of humans is a grouping based on shared physical traits ancestry or genetics although such groupings lack a firm basis in modern biology they continue to The Anthropology of Sport and Human Movement: A Biocultural Perspective:

The evolution of the human species has always been closely tied to the relationship between biology and culture and the human condition is rooted in this fascinating intersection Sport games and competition serve as a nexus for humanity's innate fixation on movement and social activity and these activities have served throughout history to encourage the proliferation of human culture for any number of exclusive or inclusive motivations money fame Recommended CHOICE November 2011 To date the Anthropology of Sport has been dominated by accounts that have emphasized the social and cultural dimensions of such activities This vo
