**By Andres R. Edwards : Thriving Beyond Sustainability: Pathways to a Resilient Society** sustainable development or sustainability has been described in terms of three spheres dimensions domains or pillars ie the environment the economy and society 2 global context for sustainable urban transformation national governments and

international agencies have struggled to respond to climate change and it is clear [Thriving Beyond Sustainability: Pathways to a Resilient Society](#):

Every fifteen seconds on our Earth a child dies from waterborne disease Three times an hour another species becomes extinct Each day we consume eighty five million barrels of oil and pump twenty three million tons of carbon dioxide into an already warming atmosphere But against this bleak backdrop beacons of hope shine from thousands of large and small initiatives taking place everywhere from isolated villages to major urban centers [Thriving Beyond](#)
