books Developing Ecological Consciousness: The End of Separation:

2 of 2 review helpful Excellent text for non majors environmental connection course By Laura Hake I ve been looking for a text that will help me connect students with Earth Earth s current crises and offer training and inspiration for a way forward with hope There are many excellent environmental science texts on the market however they don t create the grounding and guidelines for reflection and cultural map re evalua Developing Ecological Consciousness is a marked departure from those standard environmental studies texts strongly focused on actions that humans need to take to fix the environment Christopher Uhl explores the path to living in harmony with Earth and believes it begins mdash not with fixing the environment mdash but with fixing ourselv Christopher Uhl at once offers a loving joyful invitation and a profound challenge to transform our relationships with Earth With great clarity and insight Uhl shows us that the ecological crisis is fundamentally about who we are as individual
