Human liberation has become an epochal challenge in today's world requiring not only emancipation from oppressive structures but also from the oppressive self. It is a multidimensional struggle and aspiration in which knowledge—self, social, and spiritual—can play a transformative role. Knowledge and Human Liberation Towards Planetary Realizations undertakes such a journey of transformation and seeks to rethink knowledge. This book by Ananta Kumar Giri is very timely as the author discusses one of the key trends of contemporary global changes—knowledge, human liberation, and planetary realizations. Indeed, sometimes too much attention is paid to the economy.
